These blue leather lace-up sneakers from Common Projects are a bright and classic addition for your wardrobe this spring! The light blue leather style adds a bright and unique flare for any casual ensemble.

SUPERHOUSE

SUPERHOUSE BY MAGNUS STROM
CONCEPT
SUPERHOUSE.ME

There are no better words to describe this jaw dropping home concept by Magnus Strom; the Superhouse name does it enough justice already. The Superhouse will be your safe haven. The architectural simplicity and elegance of the Superhouse is only part of the appeal and the unique house will connect you with the contemporary environment. The Superhouse is curating a lifestyle, and frames it as your own. Only 30 Superhouses will be created around the world as a means to entice clients with the exclusivity of the home.

This fictional house is set in the Mediterranean and does feature a large swimming pool, outdoor fireplace, and a descending spiral staircase from the main floor to the semi-outdoor ground floor. The Superhouse's interior is designed and decorated with a circular theme, and the spiral staircases cascades down from the center of the home through a large circular opening. Magnus Strom has developed the true guide to luxurious living with the Superhouse. With your own private dock and magnificent views, the Superhouse will leave you speechless.
